

Maryana Shnitser

Geospatial & Economic Analyst | Applied Spatial & Data Analytics | maryanashnitser.com
(267) 307 - 6254 | maryanashnitser@gmail.com | [LinkedIn](#)

TECHNICAL SKILLS

Data Analysis: Python, R, Stata, Git, GitHub, SQL, Microsoft Suite

Geospatial Analysis & Cartography: ESRI software (ArcGIS Pro, ArcGIS Online, ArcPy, ArcGIS Administration), QGIS, Google Earth Engine (GEE), ERDAS Imagine, OSM, JOSM, Adobe Illustrator, HTML, CSS

Languages: English (Native), Ukrainian (Native/Bilingual), Russian (Basic)

PROFESSIONAL EXPERIENCE

National Audubon Society

Washington, DC

Dangermond Fellow

June 2026 - Present

- Collaborate with science, policy, and technology stakeholders to design, develop, and manage geospatial products that support conservation planning, species monitoring, and long-term research initiatives
- Develop Python- and ArcPy-based geoprocessing tools and scripts to automate recurring spatial analysis, reducing manual processing time and improving reproducibility across projects
- Build and maintain ArcGIS Online applications, dashboards, and workflows that support community engagement, data collection, and organization-wide data management
- Administer Audubon's enterprise ArcGIS Online environment for 800+ users, managing user roles, licensing, and platform governance while delivering technical support and training to staff and partners

George Washington University

Washington, DC

Research Assistant - Rapid Arctic Environmental Change (RACE) Project

February 2024 - May 2026

- Developed GIS workflows to compile, clean, and integrate infrastructure datasets with climate models under different climate scenarios to quantify economic impacts on Arctic communities and industries
- Synthesized academic and policy research to inform new and ongoing projects and worked on grant proposal development to support applications for climate resilience research funding

Field Research Assistant - Circumpolar Active Layer Monitoring (CALM) Project

August 2023 - August 2025

- Collected field data on permafrost active layer thickness at multiple field sites in Alaska, contributing to long-term IPCC datasets and supporting ongoing research on Arctic environmental change
- Supported data management, quality control, and field logistics for Arctic research teams, integrating field observations into standardized datasets used for long-term climate modeling

TeleGeography

Washington, DC

Market Research and Pricing Analysis Intern

May 2024 - August 2024

- Collected, validated, and updated data for over 7,000 business broadband plans, ensuring data accuracy and consistency within TeleGeography's database
- Conducted quantitative and qualitative market analysis to identify pricing structures, competitive patterns, and regional differences across international telecommunications markets

SELECTED PROJECTS

George Washington University — Department of Economics

August 2024 - December 2024

Economics Thesis, Title: *The Impact of Metro Accessibility on Residential Property Values and Population*

Clustering: A Spatial Analysis of Washington, DC

- Created a comprehensive spatial dataset combining property values, demographic attributes, and neighborhood characteristics for Washington, DC
- Conducted spatial econometric analysis in Python and ArcGIS Pro to evaluate housing market trends and population dynamics, reveal preferences, and inform future policy and planning decisions

EDUCATION

The George Washington University

Washington, DC

B.A. in Geography, Economics (departmental honors) | GPA: 3.89

May, 2025

Minor: Geographic Information Systems (GIS)
